I. Course Description:

As theoretical approaches to studying gender have shifted in the academic world, practical approaches to international development have changed to reflect them. In this course, we will focus on the relationship between theories of gender and their relationship to policies and programs designed to ameliorate the lives of the world’s poorest. We will focus on understanding and applying a “gender lens” to concrete issues of development, developing a unique set of analytic tools for grappling with the complexities of development questions. To this end, the readings will emphasize theory at the beginning of the course and focus on concrete and area-specific issues later in the course, but we will always tie these two aspects together during our time in class.

We will discuss the major trends in feminist theorizing, particularly in the postcolonial world, as well as the shifting paradigms of local and global organizations in designing and implementing “local” development projects. The course is divided into three sections. In the first section, we will build our “toolkit.” We will study how gender has been used to critique dominant economic models, and examine competing visions of gender-sensitive development as a way to orient our analyses later in the course. In the second section of the course, we will examine the gender politics of basic development topics such as economic integration, agrarian change, and health, focusing on how these issues have been addressed in various “local” contexts in the developing world. In the last part of the course, we will problematize the divide between “developing” and “developed” nations by examining the new global economy through a gendered lens, concluding the course with an examination of competing transnational strategies to imagine creative and equitable visions of development worldwide.

II. Grading and assignments:

Students will be graded on the following assignments:

1) **Weekly reading responses (<300 words):** In these assignments, you will reflect upon the readings for the week and connect them with material covered earlier in the class. These are not summaries, but it will be useful for you to state the key concept/contribution of the reading in your response. Mainly, the responses should focus on what stood out to you about the readings and what it made you think about. Each student must post one response to the course conference per week and I encourage you to read one another’s responses.

2) **Participation/Attendance:** Discussion, exchange, and participation are critical components of this class and class time will be important in facilitating your understanding of the readings. Therefore, attendance is mandatory. More than two
absences during the course of the term will dramatically affect your participation grade. Tardiness is not acceptable; if you are more than 10 minutes late to class, it will count as an absence. If you are consistently late by a few minutes, this will affect your participation grade as well.

3) **Exams:** There will be two take-home exams covering material presented in the readings and discussion. These exams are to be completed individually. You may refer to any and all course materials in preparing the exam. The second exam will be cumulative in scope, but both exams will be the same length and weighed the same in the grading. **Exam format:** Exams will include several identifications (to be described in a 1-3 sentences), short essays (outlining the key aspects of a specific topic in a paragraph), and one essay (an analytical question that will ask you to draw upon the readings to analyze a specific issue).

4) **Research Paper:** Students will be required to develop a topic of interest over the course of the semester and turn in an 8-10 page research paper at the end. As part of the research paper grade, students will present their papers to the class on the last day of class, May 11th. Please note that your exams are also due that day, so please plan in advance and budget your time accordingly. More details on the requirements of the paper to follow.

Your final grade will be computed as follows:
- Participation/Responses: 25%
- Exams: 40%
- Research Paper (including presentation): 35%

*A note about grading: I grade work according to quality, effort, and a demonstrated understanding of the key concepts of the course/assignment. A grade of “B” indicates good work. It means that you have made adequate effort, have shown that you understand the main ideas, and have met the expectations of the class. To get a grade in the “A” range, your work must surpass those expectations. In short, “A’s” are for work at an excellent level. Grades of “C” or below indicate that you have not fulfilled the expectations of the coursework, either by not completing the assignment or by not putting in the required time and effort.

III. **Course Materials:**

Most of the readings for this course are available either through e-reserve or electronically through the Wellesley library. In addition, you are required to purchase the following texts, available at the bookstore and also on reserve at the library:

IV. Outline of Course:

February 2\textsuperscript{nd}: Introduction and outline of the course

**PART I: Defining Development, Understanding a Gender Lens**

February 5\textsuperscript{th}-12\textsuperscript{th}: Defining Development with a Sociological Toolkit

February 16\textsuperscript{th}-19\textsuperscript{th}: What is a gender lens?

February 23\textsuperscript{rd}-26\textsuperscript{th}: Competing Visions of Gender and Development

March 2\textsuperscript{nd}-5\textsuperscript{th}: Economics and Households through a Gender Lens

• PAPER PROPOSALS DUE MARCH 5TH

PART II. The Gendered Politics of “Local” Development

March 9th-12th: New Strategies of Economic Empowerment for Women
• In-class film: Small Change, Big Business: The Women’s Bank of Bangladesh 10 Years Later

March 16th-19th: Women’s Health, Mothers’ Health

SPRING BREAK: MARCH 23rd-27th

March 30th-April 2nd: Midterm Review & Exam I
• In-class workshop on “local” development on April 2nd
• EXAM I DUE IN CLASS

April 6th-9th: Agricultural Transformation and Land Distribution

PART III. The Gendered Politics of the “Global” Political Economy

April 13th-16th: Gender and the New Economy I: Producing Gender in Global Factories
• Salzinger, Leslie. 1997. “From high heels to swathed bodies: gendered meanings under production in Mexico’s export-processing industry.” Feminist Studies. 23(3) 549-574.
• Lee, Ching Kwan. 1995. “Engendering the worlds of labor: women workers, labor markets, and production politics in the South China miracle.” American Sociological Review. 60 (June: 378-397)

April 20th-23rd: Producing Gender in the Global Service Sector

April 27th-April 30th: Gendered Knowledge/Politics from Below

May 4th: Transnational Possibilities

May 7th: Review for Final and Wrap-Up

May 11th: In-class presentations

• EXAM II DUE IN CLASS
